Summary

Software Developer with Hands-on experience in building and releasing production grade Shopify apps and extensions using React, Remix, node.js and Shopify APIs. Leveraging AI-assisted coding for faster iteration and timely delivery. Designed and implemented n8n automation workflows for end-to-end UI, vulnerability and performance detection across the application stack.

Skills

Programming & Stacks: HTML5, CSS, Javascript, TypeScript, React.js, Remix, Node.js

Databases: MySQL, MongoDB, Firestore, Pinecone (Vector DB), Quadrant, OracleSQL, Postgres

Platform & Tools: Shopify, Chrome Extensions API, Docker, AWS, Supabase, Firebase, Git and CI/CD.

AI & Automation: Claude, Cursor, n8n, Playwright, K6, RAG Pipeline, LLM fine Tuning, Prompt Engineering.

Professional Experience

Acodez IT Solutions

June 2025 – ongoing

Software Developer/ Automation Tester

Calicut, Kerala

- Engineered and published **2 production grade Shopify applications** — an AI-powered shopping assistant and a dynamic product filter and search — actively serving **100 + global merchants** built on Remix.js and Shopify APIs.
- Developed and shipped **N8N Copilot** — a Chrome extension leveraging AI to assist users in constructing n8n automation workflows — scaled to **8,000 + installs** and **1,000 + active users** with a sustained **4.5 Chrome Web Store rating**.
- Architected **N8N automation workflows** integrated with **Playwright** and **K6** to automate end-to-end UI testing and load testing across Shopify applications, ensuring release stability and reducing manual QA effort.

Projects

Aco Product Filter & Search | *Remix, Posthog, Pinecone*

Jan 2026 – Sep 2026

- Build a **Shopify app** on top of Remix.js And TypeScript injecting dynamic product filters across collection and search pages — featuring **30+ customizable UI settings** and real-time analytics via **PostHog**.
- Implemented a **zero-server-hit filter architecture** using Shopify **Metafields** and **Storefront API** — eliminating redundant server requests on filter hits.
- Integrated **RAG pipeline with Pinecone** vector database to power semantic search — enabling intelligent, context-aware product discovery beyond traditional keyword matching.
- Initiated **K6 load testing n8n Worklow** connected via Discord commands which is automated to send **real-time traffic** to the storefront using our filters and sends analysis report via Discord

N8N Copilot - Chrome Extension | *Node.js, Firebase*

July 2026 – Dec 2025

- Engineered an **AI-powered Chrome Extension** that converts natural language English prompts into **N8N workflow JSON** and directly injects it into the N8N workflow panel — eliminating manual workflow building for automation engineers. Build Completely using **HTML5** and **CSS**
- Scaled the extension to **8,000 + total installs** and a **4.5 rating** on the Chrome Web Store — demonstrating strong product-market fit and consistent user satisfaction.
- Designed a **Playwright optimization and Regression testing N8N workflow** to ease my unit testing process.

Awards & Certifications

- MERN Stack Certificate – Jspiders(2025):** Completed foundational and advanced full-stack development course with an industry level project completion
- Vector search with RAG / Introduction to Playwright – Simplilearn 2026:** Covered foundational understanding on RAG and Playwright

Education

B.Tech Mechanical Engineering

Jyothi Engineering College, Thrissur

Graduated: 2024

CGPA: 6.2 / 10
